

## **PDI Manteca Location**

PDI has a new site this year to serve San Joaquin County. The LINDBERGH EDUCATIONAL CENTER provides a comfortable learning environment and a computer lab on site for us to use. We are very excited about this new location.

Monday morning we begin registration at 8:00 am in rm P11. You will sit down and enjoy some complimentary refreshments while you fill out the enrollment documents. Then the PDI staff will:

- Go through the your PDI registration bag (THAT'S RIGHT, FREE STUFF)
- Answer any questions you may have about our FAQ's
- Go over the course syllabus, provide examples of
- Lead some ice breaking activities to start the week off right.

We call all these activities "Nuts and Bolts."

After lunch on your own, we proceed right into the computer lab. Several tutorials in a variety of area will be available for teachers to explore with demonstrations.

Tuesday morning will be back in the lab. This day will be devoted to Web 2.0. You got it...turning the old fashioned read only web into the exciting read AND write web for teachers and students, alike. We will establish a starting point and direction by the close of Tuesday.

Wednesday, we are fortunate to have DyAnne Neilson-Fry to present. Her presentation is highly interactive, energetic, and just plain fun. She will walk you through the intricacies of building web pages and involving mass media from the internet into your classroom. You will exit from Wednesday's all day session feeling empowered and excited about the upcoming school year!

Thursday will be devoted to the art and science of being a classroom teacher. This day's session will be mainly small discussions on a variety of topics from the physical environment in your class room to communicating with your administrator. Bring the things you do successfully and challenges you encounter to explore them while building quality learning networks.

Friday, we are happy to welcome Logical Choice and Promethean to Manteca. These companies collaborate to bring to us the finest interactive white board to market. The session will allow us to experience the future of classroom education. After we will present our final projects and share them.
